About the Role
We're looking for a Senior Frontend Engineer to join our growing team. You'll be responsible for building and maintaining our customer-facing web applications, working closely with design and backend teams.
Requirements
- 5+ years of experience with React and TypeScript
- Strong understanding of modern CSS and responsive design
- Experience with state management (Redux, Zustand, or similar)

Summary
The candidate's resume is unparseable, consisting only of PDF metadata and stream data. This prevents any evaluation against the job description. Without verifiable work experience or stated technical skills, I cannot recommend them for an interview.

Dear Candidate,
Thank you for your interest in the Senior Frontend Engineer position at our company. We appreciate you taking the time to apply.
We've reviewed your application, and while your background is interesting, we will not be moving forward with your candidacy for this role at this time. We wish you the best in your job search.
Sincerely,
[Hiring Team]
