Hiring Should Build Teams, Not Drain Them

Small and medium-sized companies often face a significant challenge: they receive hundreds of resumes for each open role, yet possess limited HR bandwidth to screen them effectively. This leads to recruiters spending invaluable weeks sifting through PDFs, rather than engaging with top-tier talent.

Slow Hiring Cycles

The traditional screening process prolongs recruitment, delaying critical team growth.

Decision Fatigue

Overwhelmed by volume, recruiters experience burnout, impacting decision quality.

Candidate Drop-off

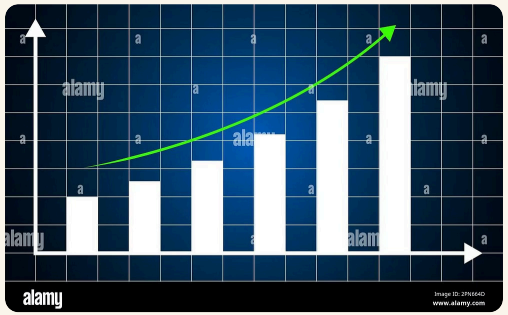
Strong candidates disengage within 7–10 days due to protracted processes.

Made with GAMMA

A Massive, Underserved Hiring Market

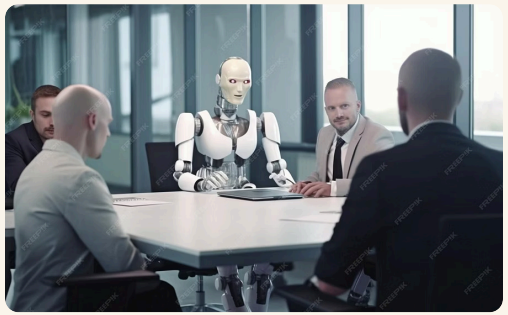
Global Startups & SMBs

Over 1 million startups and small to medium-sized businesses globally are prime candidates for innovative hiring solutions.



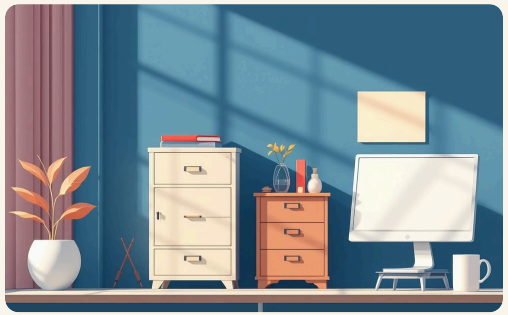
Expanding Market

The recruitment software market is valued at $8–10 billion, indicating substantial financial opportunity for disruption.



AI Adoption in Startups

Startups are demonstrating a rapid adoption rate of AI-first internal tools, outpacing larger enterprises.



ATS Limitations

Existing Applicant Tracking Systems (ATS) predominantly focus on storage and compliance, rather than actionable decision-making.

There is a clear opportunity for a lightweight, action-oriented hiring copilot tailored for lean teams, focusing on intelligent decision support rather than just data storage.

Recruit-AI: Your Agentic Hiring Copilot

Recruit-AI is an intelligent hiring copilot designed to mimic the analytical prowess of a human recruiter. It doesn't merely store data; it actively processes, evaluates, and acts, transforming the hiring workflow.

01

Human-Like Resume Analysis

Our AI reads and comprehends resumes with the nuance of an experienced human recruiter.

02

Objective Candidate Evaluation

Candidates are meticulously evaluated against specific job description criteria, ensuring a precise fit.

03

Transparent Insights

It articulates strengths, identifies gaps, and explains the overall role fit, providing clarity and confidence.

04

Actionable Recommendations

The system recommends optimal next steps, streamlining the decision-making process.

05

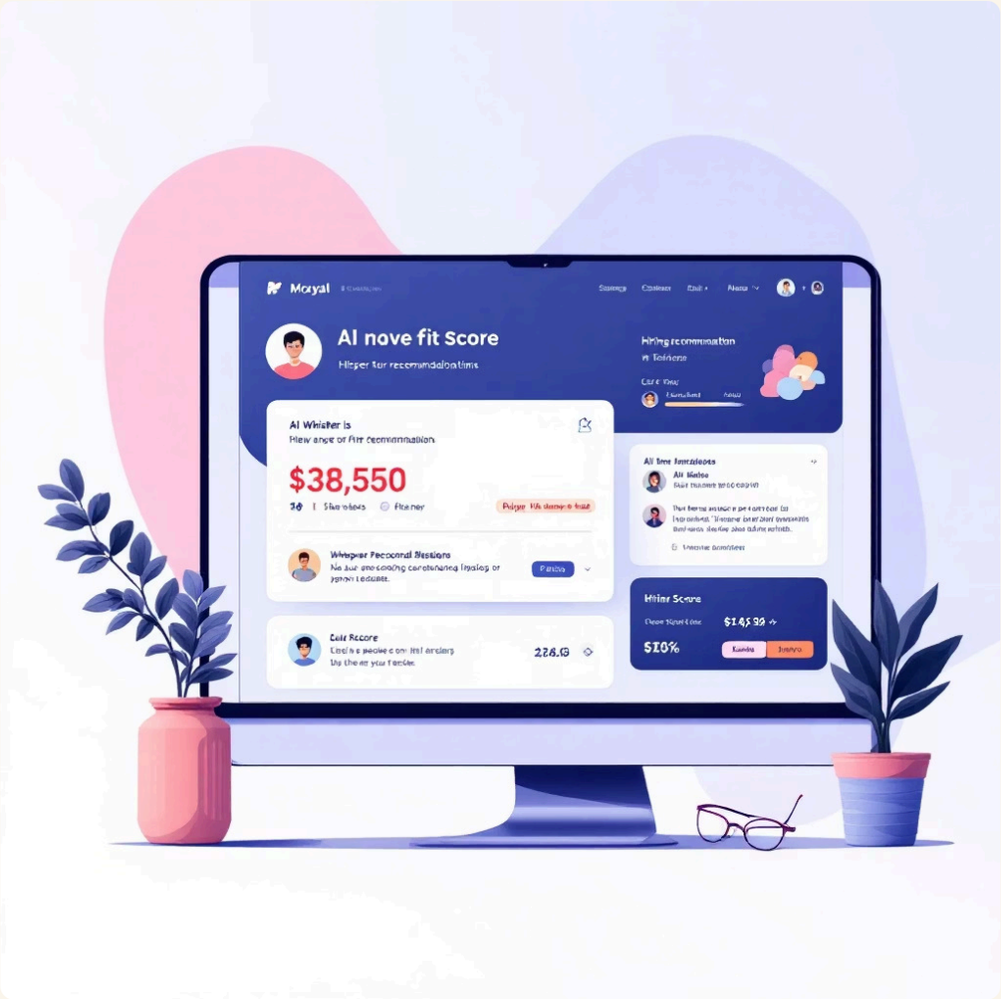
Automated Workflows

Triggers automated interview scheduling or rejection workflows, significantly reducing administrative burden.

The outcome is a faster, more confident hiring decision process with substantially reduced effort.

Made with GAMMA

From Resume Overload to Instant Decisions



Recruit-AI transforms the cumbersome task of sifting through countless applications into a rapid, decisive action. Our working, clickable prototype demonstrates this efficiency.

User Flow:

- Upload Job Description + Candidate Resume
- AI Generates:
  - Fit Score (0–100)
  - Strengths & Gaps
  - Clear Hiring Recommendation
- One-Click Action:
  - Schedule Interview
  - Send Rejection Email

This streamlined process ensures that crucial hiring decisions can be made in seconds, not weeks.

Modular, Explainable, Production-Ready Architecture

Our robust technical architecture is designed for transparency, flexibility, and scalability. Each component serves a distinct purpose, ensuring both efficiency and auditable processes.

Auditable Steps

Every stage of the process is traceable, allowing for clear insights into how decisions are reached.

Agent Improvement

The modular design facilitates easy and independent enhancement of individual AI agents, ensuring continuous improvement.

No Black-Box Scoring

We avoid opaque "black-box" scoring, providing clear, explainable evaluations and recommendations.

This foundational approach ensures our solution is not only powerful but also trustworthy and adaptable for future advancements.

Roadmap & Business Model: Focused on Real Recruiter Value

1

Phase 1 (0–6 Months)

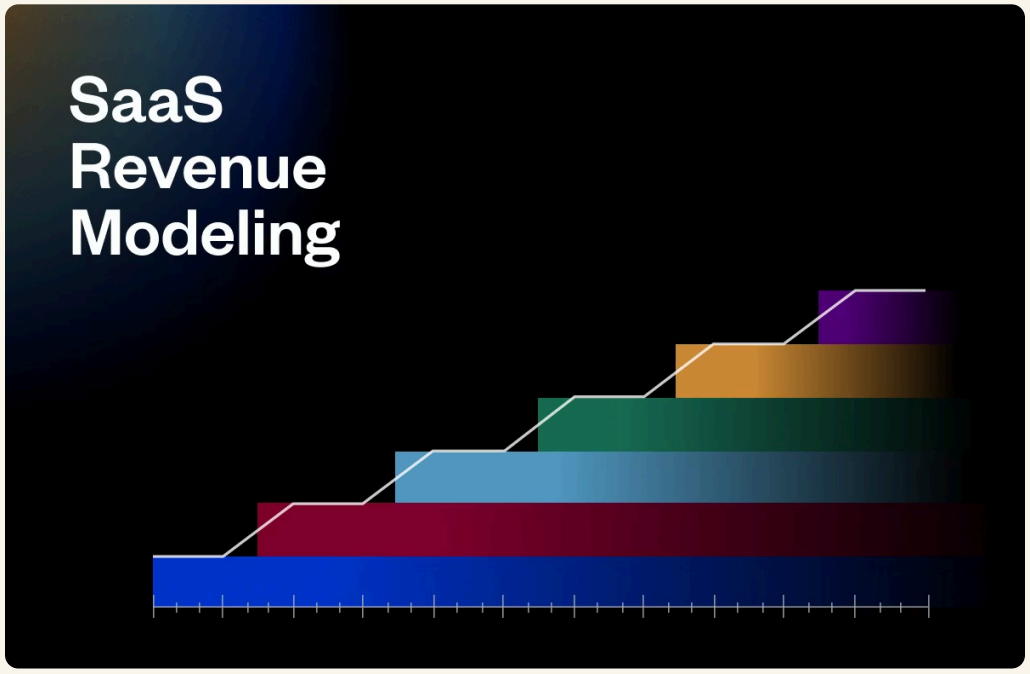
- Resume Screening
- Hiring Recommendations
- Interview Scheduling

2

Phase 2 (6–12 Months)

- Multi-Candidate Ranking
- Bias & Fairness Insights
- Learning Loop from Recruiter Decisions

Our phased roadmap is strategically designed to deliver immediate value while building towards a comprehensive, intelligent hiring platform. Each development is meticulously planned to meet the evolving needs of modern recruitment.



Revenue Model: SaaS Pricing

Our business model is based on a scalable SaaS subscription, offering flexibility for companies of all sizes.

- Per active role
- Per recruiter seat

This ensures alignment with client usage and provides predictable revenue streams for sustainable growth.
